---

## PROJECTS

---

Automatic Document Processing – Created system that receives an incoming email, processes the emails attachments for useful information and writes this information and attachment to salesforce.

Power BI Dashboards – Created internal and external web accessible Power BI embedded dashboards.

spotify-lyrics.com – A personal project I created to display the lyrics of the current song the user is listening to on Spotify. More info on my GitHub.

Degree Audit – A simple java-based program that audits the user's coursework. More info on my GitHub.

Full list of projects and other completed tasks on my LinkedIn.
